

# MOHAMED ASMI

## MOBILE DEVELOPER - REACT NATIVE / FLUTTER

+94 78 923 8808 | shamsudeenasmi96@gmail.com | linkedin.com/in/mohamed-asmi-9133b4201  
47/A Spill Road, Puttalam, Sri Lanka

### PROFESSIONAL SUMMARY

**Mobile Developer / Software Engineer with 6+ years of software development experience** building cross-platform mobile, web, desktop and backend systems. Experienced with React Native, Flutter, JavaScript/TypeScript, REST API integration, authentication, offline-first workflows, local synchronization and relational databases. Strong background in reusable UI development, debugging, performance optimization, backend integration and production support.

### EXPERIENCE

**Software Engineer**  
**Imara Software Solution**  
2020 - Present | Sri Lanka

- Develop and maintain cross-platform mobile application features with REST API integration, authentication and business workflows.
- Build reusable mobile UI components and manage application state using maintainable patterns including Provider and Bloc.
- Implemented offline-first workflows with local persistence, queued synchronization and server reconciliation for connectivity-sensitive applications.
- Optimized API queries, resulting in 30% faster data retrieval and improved application responsiveness.
- Build and support Laravel/PHP backend APIs, relational databases, Linux/VPS deployments and scheduled processes used by mobile and business applications.

**Software Developer**  
**Ecoz Labs**  
2019 - 2020

- Developed and maintained web and mobile application features with supporting backend APIs and database operations.
- Worked on API integrations, debugging, testing, deployment support and iterative feature delivery.
- Maintained client-facing applications and resolved application and database issues.

**Junior Software Developer**  
**Adsfly**  
2017 - 2019

- Implemented application features, backend logic and database operations.
- Worked with Git, bug fixing, testing and deployment workflows while strengthening software engineering practices.

### SELECTED PROJECTS

#### POSMate - POS & Business Management Platform

Desktop/Electron + mobile app + Laravel backend. Includes sales, purchases, returns/refunds, stock and product variants, barcode workflows, customer/supplier management, due payments, reporting, receipt printing and offline synchronization.

#### Frappe / ERPNext Education + Mobile App

Education management solution covering students, instructors, admissions, fee plans, scheduling, attendance, examinations, results and student-facing services through ERPNext/Frappe and a companion mobile application.

#### AI-Powered 360 Virtual Tour System for Real Estate

Individual academic project built with Laravel, focused on immersive real-estate tour experiences, authentication, role-based access, responsive UI and extensible tour-management functionality.

### MOBILE DEVELOPMENT CONTRIBUTIONS

- Developed reusable mobile UI components, responsive layouts, forms, validation and navigation flows.
- Integrated REST APIs with authentication, JSON handling, error states and mobile business workflows.
- Applied state-management patterns to organize application state, predictable UI updates and cleaner feature flows.
- Supported testing, debugging, release preparation, performance improvements and production issue resolution across mobile and backend systems.

### KEY STRENGTHS

#### Cross-Platform Mobile Development

React Native, Flutter and responsive mobile application development across business workflows.

#### JavaScript / TypeScript

Frontend and mobile development experience using JavaScript, TypeScript, React and Electron.

#### API & Backend Integration

REST APIs, authentication, JSON handling, Node.js/Laravel services and relational databases.

#### Performance & Reliability

API optimization, offline synchronization, debugging, testing and production issue resolution.

### TECHNICAL SKILLS

#### Mobile

React Native, Flutter, Dart

#### Languages

JavaScript, TypeScript, Dart, PHP

#### UI Development

Reusable components, responsive UI, forms, validation

#### State Management

Provider, Bloc; state-management fundamentals

#### API Integration

REST APIs, authentication, JSON, error handling

#### Offline / Storage

SQLite, local storage, sync workflows

#### Backend

Node.js, Laravel, PHP

#### Frontend

React, Electron

#### Databases

MySQL, PostgreSQL, MariaDB, SQLite

#### Cloud / DevOps

AWS, SQS, Linux, VPS, GitHub Actions, CI/CD

### EDUCATION

#### BSc (Hons) Computing Science

**Software Engineering (Top Up)**  
Kingston University, UK | 2025

**Higher National Diploma**  
**Information Technology (HNDIT)**  
2017 - 2019

### TOOLS & PLATFORMS

#### React Native / JavaScript / TypeScript

Cross-platform mobile development stack

#### Flutter / Dart Tooling

Mobile development, debugging and release workflows

#### Git / GitHub / GitHub Actions

Version control, collaboration and CI/CD workflows

#### NPM / Yarn / Composer

JavaScript and PHP dependency management

#### Linux / VPS / Server Deployment

Production setup, migration and troubleshooting

#### AWS / SQS / Background Jobs

Queue-based processing and scheduled workflows

### CORE EXPERTISE

#### Cross-Platform Mobile Development

React Native / JavaScript / TypeScript

#### Reusable UI Components & Responsive Design

REST API & Backend Integration

#### Offline Data Synchronization

Debugging & Performance Optimization

### LANGUAGES

Tamil Native  
English Professional
